Supply Chain City, Singapore

# 9 MONTHS . 6-MODULES GUIDED APPLICATION

1

## Fundamentals of Logistics (5 Days in TW)

Logistics fundamentals . Supply chain principles . Logistics network . Inventory management . Warehouse management . Transportation management . Distribution management . Procurement management . Reverse logistics and sustainability . Global logistics

2

## Understanding Industry 4.0 for Logistics (4 Days in SG)

A mixture of classroom discussions and visit to YCH Corporate HQ and their flagship Supply Chain City facility to see how products will be handled for both contract logistics as well as e-commerce logistics with the help of i4.0. Participants will also visit other facilities in Singapore's logistics ecosystem to understand why other i4.0 components both in the manufacturing and transportation areas.

3

## Operations & Technology Roadmap (2 Days TW / 3 Weeks Online)

The Operations & Technology Roadmap allows participating companies to apply the value stream map to uncover unproductive work processes, and redesign the flow to ensure that it provides the outcomes in the least cost and time. It then layers on the technological solutions that can help enable these in a seamless and autonomous manner.

4

## Streamlining & Digitalizing (2 Days TW / 3 Weeks Online)

Streamlining and Digitalizing is the step which executes the OTR, including the selection of the technology and vendor, and the training plans required. It also looks at jobs and how they have to be redesigned to function in this new space!

5

## Pilot Project (2 Days TW / 3 Months Online)

Pilot Project is the next step where participating companies will launch a pilot to test the assumptions and workflows, looking at how man and machine function together seamlessly.

6

## Scale Up (2 Days Online)

Where participant companies will plan the full rollout of the modernization efforts
