Supply Chain City, Singapore

9 MONTHS . 6-MODULES GUIDED APPLICATION

1

Fundamentals of Logistics (5 Days in TW)

Logistics fundamentals . Supply chain principles . Logistics network . Inventory management . Warehouse management . Transportation management . Distribution management . Procurement management . Reverse logistics and sustainability . Global logistics

2

Understanding International Trade with YCH (4 Days in SG)

A mixture of classroom discussions and visit to YCH Corporate HQ and their flagship Supply Chain City facility to see how products will be handled for both contract logistics as well as e-commerce logistics. Participants will also visit other facilities in Singapore's logistics ecosystem to understand why Singapore is the World's Top Logistics Country (LPI#1).

3

Mapping Products / Services (2 days in TW / 3 Weeks Online)

Mapping Product / Services is the first step that companies will take stock of their products and services and assess the internationalization value through various planning canvases. Participants will deploy these canvases over the next month with online support, ready to meet in the next session one month later.

4

Execution Planning (2 days in TW / 3 Weeks Online)

Execution Planning takes the participants to the next stage where they will use the products identified in the previous module to plan for its international penetration, using the assets that YCH Group can offer. This will be co-facilitated by YCH Group

5

Pilot Project (2 Days in TW / 3 Months Online)

Pilot Project is the next step where participating companies will launch a pilot to test the assumptions and workflows, looking at the trade links and possible barriers that need to be overcome.

6

Scale Up (2 Days Online)

Where participant companies will plan the full rollout of internationalization efforts

FEE: NT\$620,000
